Pratiksha Bhagat

Pune (MH), India | +91-9699292651 | pratikshabhagat651@gmail.com | Linkedin | GitHub

OBJECTIVE

AI/ML Engineer focused on building LLM applications that are measurable, not just demoable. Experienced in RAG pipelines, hybrid retrieval, and agentic workflows using LangChain, LangGraph, and MCP, validated with metrics like Recall@K, MRR, and Faithfulness. Driven to ship reliable, well-tested Al systems..

EDUCATION

- **Savitribai Phule University of Pune** *2022-2026*
  BE-Artificial Intelligence and Data Science CGPA: 8.79/10
- **Jijamata Science Collage Ahmednagar** *2021-2022*
  Higher Secondary Education Percentage: 74%

SKILLS

- **Programming Languages :** Python ,SQL, OOP, Data Structure, Exception Handling
- **Machine Learning :** Scikit-learn, Regression, Classification, Feature Engineering, Model Evaluation
- **APIs & Framework :** FAST APIs, REST APIs, Json, API Development, Flask, Django, Pydantic, Streamlit
- **Generative AI :** LLMs, Prompt Engineering, Rag, Self-Rag, CRAG, Langchain, AI Agent, Tool Calling, Langgraph, MCP, LoRA Fine-Tunning
- **RAG & Retrieval :** FAISS, Pinecone, Semantic Search, Hybrid Search, BM25, Reciprocal Rank Fusion
- **Databases :** Oracle SQL, SQLite, MongoDB, CRUD Operations.
- **Libraries & Tools :** Numpy, Pandas, PyTorch, Hugging Face, LangSmith, Git, Github, Jupyter Notebook, Google Colab, Vs Code
- **Cloud Technologies :** AWS(EC2 ,S3), Azure, Docker, CI/CD.

EXPERIENCE

· Ishan Technologies *June 2026 - Sep 2026*

AI/ML Developer Intern Pune

- Developed AI-powered Voice AI applications using Large Language Models (LLMs), Speech-to-Text (STT), and Text-to-Speech (TTS) technologies.
- Built and integrated end-to-end voice pipelines using Python, FastAPI, REST APIs, and AI models for real-time conversational applications.
- Worked on NVIDIA DGX servers, deploying and managing AI/ML workloads in Linux-based environments.
- Configured, deployed, and monitored AI services using Docker containers and GPU infrastructure.
- Integrated speech recognition models such as NVIDIA Parakeet and Whisper for multilingual speech processing.
- Worked with LLMs including Nemotron, Gemma, and other open-source models for intelligent conversational AI.

· Cyperts Digital Solution Pvt .Ltd *Nov 2025 -Apr 26*

AI/ML Developer Intern Pune

- Built Integrating FastAPI REST APIs for property workflows, document ingestion, and AI search.
- Implemented RAG pipelines with FAISS/Chroma vector DB + Elasticsearch for hybrid search.
- Processed PDFs into embeddings for semantic retrieval.
- Built AI modules for search, document analysis, and property insights.
- Deployed backend + AI services on AWS.
- Performed extensive data scraping and API testing with Postman.

· Rajavi Technologies Pvt .Ltd *Dec 2024 - Feb 2025*

Data Science and Analyst Intern Pune

- Worked with large datasets to find useful patterns and trends using Python, AI , ML and SQL.
- Made easy-to-understand charts and dashboards using tools like Tableau and Power BI.
- Gained hands-on experience with Libraries like Pandas, NumPy, and Matplotlib.

PROJECTS

· Enterprise Real-Time CX AI & Speech Platform

Key Skills: ***Python, Gemini, LangChain, LangGraph, IndicConformer, Kafka, Redis, Kubernetes, GCP***

- Developed a real-time AI voice platform using Python and microservices for customer-support interactions, integrating STT, TTS, LLM, Agent Insights, and Knowledge Base summarization.
- Engineered multilingual **Speech-to-Text (STT)** using **AI4Bharat IndicConformer** and NVIDIA Parakeet ASR, supporting Indian languages with GPU-accelerated inference and REST/gRPC APIs.
- Built an event-driven audio processing pipeline using **Apache Kafka** and **Redis Streams** for asynchronous audio processing, job queuing, and high-concurrency workloads.
- Implemented RAG-based document and call summarization using **LangChain and Elasticsearch**, with Map-Reduce processing for long transcripts and knowledge-base documents.

- Developed **agentic AI** workflows using LangGraph and Gemini, enabling SOP/compliance checks, sentiment analysis, rule-violation detection, and semantic case search.
- Containerized and deployed AI services on **Kubernetes/GKE** with GPU-based inference, focusing on low latency, scalability, reliability, and production-ready API integration

- **AI-Powered Medical Chatbot**

Key Skills: ***Python/ Fast API/ LLM/ HTML***

- Developed an **AI-powered medical chatbot** using **Python, FastAPI, and LLMs** to provide real-time conversational health assistance
- Integrated **OpenAI GPT** for **symptom analysis** and conversational medical assistance.
- Built a **secure web-based chatbot interface** using **FastAPI and HTML** for seamless user interaction..
- Designed **RESTful APIs** to handle user queries and integrate the chatbot with the LLM backend.

- **AI Interior Design Studio**

Key Skills: ***Python/ Fast API/ LLM/ Streamlit.***

- Developed an **AI-powered interior design application** using **Python, FastAPI, LLMs, and Streamlit** to generate personalized room design recommendations.
- Integrated **LLM-based image and design analysis** to provide furniture, color, layout, and décor suggestions based on user requirements.
- Built **FastAPI** to handle user inputs and connect the application with AI/LLM services.
- Developed an interactive **Streamlit web interface** for users to submit room requirements and receive AI-generated design recommendations.

CERTIFICATIONS

- **Anthropic Claude API Certified**
- **AWS Certified**

HONORS AND AWARDS

- **Academic Topper (***SRCOE)*
  - Achieved the highest **Academic Rank** in the department for outstanding performance across all semesters.
  - Reflecting strong subject mastery, consistency, and **Dedication** to **Academic excellence**.
- **Competition Achievement (***Smart India Hackathon)*
  - Developed an innovative solution to a real-world problem under time constraint
